

ALEXANDRIA.

MONDAY EVENING, JUNE 6.

MR. DORMAN B. EATON, in an article in the June number of the North American Review, entitled Parties and Independents, in which he essays the vain task of proving the practicability of the impractical mugwump civil service reform, says, that included in the proper sphere of party, is "bringing into office those officials, and those only, who will make the laws the people demand and execute the policy which they have approved." And that is all any good and true democrat asks of the administration for the words are true, and in writing them Mr. Eaton gave himself away, and rendered ridloulous all the other ideas contained in his article. All the democrats want of the administration of their own choosing is that the offices at its disposal shall be filled by officials, and those only, who will execute the policy which they have approved. In the nature of man it is impossible that democratic policy can be faithfully executed by republican officials.

THE WISEST thing Mr. O'Brien has done since he landed in this country was his refusal to participate in the demonstration in New York last Saturday night, gotten up nominally in his own honor, but really in that of Mr. George and Dr. McGlynn, and as an endorsement of the new idea that land should be confiscated without recompense to the owners thereof, and also, of the still newer one, that Catholics should sustain and sets his commands at defiance. Only harm to the Irish cause could result from entangling it with any such flim-flam vagaries.

than the fact that the influence of the G. A. R. is potential in all the government departments there, and that inefficient men, and even men for whom there is nothing to do, are retained therein lest the association cause of complaint. But, notwithstanding all this, the G. A. R. is so opposed to President Cleveland that they would not be appeased for the affront of inviting him to St. Louis during their encampment there, until the citizens of that city met and assumed all the responsibility of that invitation.

THE BOARD of indemnity appointed by the legislature, as one of the vain means by which the decisions of the U.S. Supreme Court could be set at defiance, has already paid out nearly nine thousand dollars for costs, while the people who have tendered coupons in payment of taxes, have thereby paid their taxes, though they still have the same coupons in their pockets, and will use them in the same way to pay their next year's taxes. There may be wisdom in the means referred to, but, if so, it is unrecognizable by people of ordinary understand-

The cause of the mystery is unexplained, but the belief is that the men, for some reason, wanted to destroy the new dredge. The police are endeavoring to unravel the mystery.

FROM WASHINGTON.

[Special Correspondence of the Alexa. GAZETTE] WASHINGTON, D. C., June 6, 1887.

A gentleman long fimiliar with governmental affairs here says that of all previous cabinets there never was one so subservient to the President as Mr. Cleveland's, every man in which, he says, seems to be in such dread of losing his place that, instead of being the President's adviser, he is afraid to his mouth except to agree to everything the President says or does. The gentleman referred to says that Postmaster General Vilas recently escorted a friend to the White House and introduced him to the President. The friend referred to was a prominent and influential democrat, who during the interview expressed his dissent from some of the President's policy in very plain but respectful terms. When they re-tired, Mr. Vilas expressed his great surprise that he should have talked to the President as he had done, and said that he would not have thought of doing so.

The news from Key West to day is sup-posed at the office of the Marine Hospital Service to be of rather a serious character. Seventeen new cases of yellow fever are reported there, and the disease has obtained entrance into the jail as well as the hotel. It reached there it is said in furniture brought by some cigar makers from Havana. The Marine Hospital Service has \$80,000 at its disposal, every cent of which will be expended, if necessary, in prompt efforts to suppress the disease and prevent its extension, as its arrival in this country so early in the season gives it time to election of which he "worked." The quoted spread over a wide region before the advent of cold weather, unless it be stamped out at once. Records of yellow fever are kept at the office referred to, and it is said there that the cycle of epidemic exemption in this country expired last year.

The flags on the Senate and House are flying at half mast to day in respect of the ex Vice-President memory of the late Wheeler. The flags referred to are the only ones in the city so flying.

Secretary Endicott has got into trouble with some of his immediate neighbors; with one because he allows children to play cro-quet on a lot adjoining his residence, and with another because the workmen employed in the erection of his house commence rs so early in the morning, and disturb his slumbers. An answer was received this morning by

works at the old Washington navy yard, the Chicago and Grand Trunk Railroad Company, to the complaint of the Michigan the ruined cannon was forty thousand dol- lower rate than that given to the public gen erally. The Chicago and Grand Trunk Railroad Company admits the sale of tickets, and the other facts stated by the road making the complaint. It holds that the form of ticket sold commercial travelers is in the nature of a special contract by which the company is relieved from some part of the liability subject to which it transports other passengers, and it is claimed that this limitation constitutes a sufficient reason for the discrimination in favor of comin the Hayes fraudulent administration. It mercial travelers. It is also stated that is said that his fatal onium habit was inthe railroad traveling public, generally riding a short distance at a time and visiting a number of places of business on the line of road; often going from one station to another by freight trains, and altogether traveling very much more than any other class of people. They also create a large freight traffic over the roads by the sal they make at places along the line. In view of these considerations it is contended that the provisions of the Inter State Commerce law do not apply to mileage tickets sold to commercial agents. Substantially the same answer is made to a simular complaint against the Chicago and Grand Trunk

Railroad Company by Louis Garrison.

It is given out here that the interstate commerce commission will decide, what the U. S. Sumerce commission will decide, what the U. S. Supreme Court could not do, that race distinctions on railroads must be obliterated.

The Presidential party is expected to return here by the end of this or the first of next week.

SHAD FOR SALT LAKE .- An experiment in fish culture is about to be tried in stock-ing Salt Lake, Utah, with shad from the breeding station near Point Lookout, on the Chesapeake. During last week one of the. Fish Commission cars reached Salt Lake with 1,100,000 young shad to be placed in the lake. It is an experiment, but the Fish Commission officials believe that the physical conditions of the waters there will make a complete success. The water of the main portion of the lake is much more dense with salt than ordinary sea water, but the inflowreduces the density for a considerable dismay select at their own free will the quality of salt water they prefer. It is stated in Chicago that Jay Gould's recent purchase of the Little Rock, Mississippi and Texas and the Little Rock and Fort Smith railroads is part of a scheme to relieve St. Louis and Chicago of the necessi ty of distributing grain and provisions and even live stock to the East and European markets, and draining the grain-producing sections of the West and Southwest into the Mississippi river below the ice point, and thence by barge lines to New Orleans, and by steamers to foreign ports, or by rail to Eastern points.

The Cunard steamship Umbria arrived at New York Saturday, after making the quickest passage on record. Her time from Queenstown was 6 days, 4 hours and 12 minutes. This is over an hour and an half quicker than the passage of the Etruria in thick fog has considerably interfered with August, 1883, which, up to Saturday, was the quickest on record. The Umbria aver-aged 475 knots a day. Her best day's run was 478 knots, and the lowest 470. She had to take a southerly course, which was 47 miles longer than the regular one, to avoid icebergs, which added over two hours to her time. She had to wait for a pilot, too, and the tide being out also delayed her.

A French Socialist.

CHICAGO, June 6 .- At the meeting of the trades and labor assembly yesterday Victor Delahaye, a French socialist, was introduced. He said he had been sent to Amer ica by the French government to investigate the labor problem in this country. He was also invested with authority to examine the various machines for manufacturing textile fabrics, and to purchase such patent rights as were deemed advisable for furthering that class of work. He gave a pretty full description of the wage problem in his country. Through political action they have gained a strong influence with the government expense, to be used for offices by the working people and labor associa tions. They were now asking the government for a loan of 6,000,000 francs with which to buy machinery for themselves. They proposed to pay this money back in sixty years. Mr. Delahaye naively added that if the government did not enable them to get the machinery they would have to take it anyway, and this remark called forth great applause. Flour is unchanged and firm. The Wheat mar kets for some days past have been irregular, due mainly to manipulation in futures, especially for June delivery, which are selling at an advance but there is a strong conservative inducement and the volume of sales show very little increase, as there is a large visible supply and only a moderate foreign demand and the new crop is soon to be of fered, harvest having already begun in portions of Missouri and Kansas; we still note, however, a good home milling demand at outside prices for strictly prime Wheats. Corn, Rye and Oats are firm and steady. Eggs are searce and wanted at higher prices. Butter is very dull and heavy Other produce is easy, but without quotable
